

Armoursafe Plastic Bog Mats / Ground Protection Mats

Armoursafe Plastic Bog Mats are a super tough recycled plastic mat which is specially designed for harsh Australian conditions. Armoursafe bog mats allow for heavy vehicle access in super boggy and difficult terrain such as sand, mud, and soft lawns. They are an ideal ground protection product for lawns and gardens, allowing heavy machinery to drive on ovals, parks, concerts and other outdoor venues without damaging the surface.

Armoursafe Bog mats can take extreme weight loads which make them ideal for concrete trucks, concrete pumps, cranes, general site vehicles and 4WD enthusiasts.

Our standard stocked bog mats are 12mm thick (plus grip lugs on both sides) and we can also custom manufacture the mats. The mats are 2300mm long and stocked in 550mm and 1100mm widths.

APPLICATIONS:

- Temporary Access Roads and Parking Areas, providing grip and level travel surface
- Construction, Earthmoving and Maintenance Sites, saving costly vehicle bogging
- Outdoor Events, Trade Shows, Open Air Concerts, Movie Sets
- Marine Protection, Sports Grounds, Golf Courses, Cemeteries
- Environmental Protection for Drilling, Exploration, Mining and Trenching

SPECIFICATIONS:

- 2300mm long x 550mm wide
- 2300mm long x 1100mm wide
- Vehicle Capacity of 20 Tonne per mat, depending on ground bearing capacity
- Standard mat thickness 12mm (plus grip lugs)
- Mat Weight: 550mm wide mats = 17kgs, 1100mm wide mats = 34kgs
- Handles on side for safe lifting, corner slots or optional holes for mat joining or staking
- Optional separate steel joiners, bayonet fit, no mat edge lifting required
